Building Community: Successes and Challenges of an AWM Student Chapter

Student organizations play an important role in fostering inclusive environments and a sense of belonging. As a Ph.D. student at Simon Fraser University, I founded and led the SFU Association for Women in Mathematics (AWM) Student Chapter. In this talk, I will discuss some of the most successful initiatives of the Student Chapter, including USRA Info Sessions and the annual Women's Luncheon. I will also highlight some of the challenges of both growing and sustaining the Student Chapter.
