Which de Branges-Rovnyak spaces have complete Nevanlinna-Pick property?

Complete Nevanlinna-Pick kernels are related to Nevanlinna-Pick interpolation problem. Many properties of the Hardy space carry over to other spaces with complete Nevanlinna-Pick property. A natural question is to decide which reproducing kernel Hilbert spaces have complete Nevanlinna-Pick property. We characterize the de Branges-Rovnyak spaces with complete Nevanlinna-Pick property. Our method relies on the general theory of reproducing kernel Hilbert spaces.
