Asymptotics of Restricted Partition Functions

Given a set $\mathcal{A} \subset \mathbb{N}$, the restricted partition function $p_{\mathcal{A}}(n)$ counts the number of integer partitions of n with all parts in \mathcal{A} . In this talk, we will explore the features of the restricted partitions function $p_{\mathbb{P}_k}(n)$ where \mathbb{P}_k is the set of k -th powers of primes. Powers of primes are both sparse and irregular, which makes $p_{\mathbb{P}_k}(n)$ quite an elusive function to understand. We will discuss some of the challenges involved in studying restricted partition functions and what is known in the case of primes, k -th powers, and k -th powers of primes.
