What happens at CMS Math Camps?

The CMS mathematics camps have been going on for many years in locations across Canada. The forms they take vary with different target audiences, times of year, and other nuances giving them local flavour. The idea of this session is to facilitate a discussion of the diversity with a dual intent of learning more about what others do while offering insights and ideas from interested others. Your participation in the session is welcomed; the role of the panel is to initiate a discussion that will be open to input from you.
